CAMBRIDGE, Mass., Dec. 1 .-Measurements made at the Harvard Observatory show that the star RZ Cephei is the fastest moving luminary yet timed on this sphere, traveling at the rate of 2,500,000 miles an hour.

As the RZ Cephei is 3,800 light years distant, the light which now reveals it to astronomers began its journey earthward in the time of the shepherd kings of Egypt, nearly 1,900 years before Christ. It has long been known as a variable star of the constellation Cepheus, being in the tenth magnitude and therefore not visible to the unaided eye.

Setting forth fourteen specific grounds for impeachment, Mr. Keller leged that Mr. Daugherty had practiced "fraud and deceit" on Mr. Taff while President to obtain the release from prison of Charles V.
